

AKSHAY OHRI

Solution Architect

Dubai, UAE | <https://akshayohri.com>

With over a decade of experience in software development, implementation, and design, I have carved a niche in the tech industry, particularly with Microsoft Dynamics AX/365, Kubernetes, DevOps, and Oracle EBS. My academic foundation was laid with a B.S. in Computer Engineering from the Milwaukee School of Engineering, a journey marked by academic excellence and a scholarship. My technical prowess spans X++, C#, Python, MSSQL, and more, underpinned by certification in Dynamics AX 2012 Development.

Professionally, my journey has taken me from Trident Information Systems, where I led significant projects for notable clients, to Techvista Systems, where I spearhead full-cycle AX/365 implementations. My role at the Prime Minister's Office and Ministry of Cabinet Affairs in Dubai, managing ERP applications and infrastructure automation, highlights my capacity for leadership and technical innovation.

Beyond the confines of my professional life, I have a voracious appetite for reading, a keen interest in physics and automation, a commitment to personal development, and a fascination with AI. These varied interests underscore my comprehensive approach to technology and underscore my belief in continuous growth and learning in both personal and professional spheres.

WORK EXPERIENCE

TECHVISTA SYSTEMS

Solution Architect/Business Consultant | Dec 2017 - Present

At Techvista Systems, I lead full-cycle AX/365 implementations and develop custom solutions, leveraging my extensive experience in software development, implementation, and design. My role involves strategizing and executing complex projects, ensuring they align with our client's business objectives and technology standards.

BUSINESS EXPERTS GULF

Project Manager | Sep 2015 – Dec 2017

Managed Payroll, HR vertical solution, and healthcare system integration with AX/365. My responsibilities included overseeing project lifecycle, from conception to deployment, ensuring solutions met the specific needs of our clients in various sectors.

TRIDENT INFORMATION SYSTEMS

Software Engineer | Jul 2013 – Sep 2015

Implemented projects for key clients like RJCorp and Hindware, focusing on Dynamics AX/365 solutions. My work involved customizing and deploying ERP solutions, optimizing business processes, and providing ongoing support and maintenance.

PROJECTS

PRIME MINISTER'S OFFICE DUBAI AND MINISTRY OF CABINET AFFAIRS

ERP Applications and Infrastructure Automation

Managed ERP applications and led Kubernetes installations and DevOps practices, focusing on infrastructure automation and optimizing operational efficiency.

OILBURG & TASNEEF

Technical Lead for Dynamics GP, AX 2012

Oversaw the implementation and management of Dynamics GP and AX 2012 systems, ensuring they aligned with business requirements and facilitated streamlined operations.

ELABELZ

Dynamics 365 Implementation and Integration

Implemented Dynamics 365 and integrated it with various platforms including Odata, .Net, Magento, DHL, enhancing the e-commerce capabilities and operational efficiency of the business.

EDUCATION

MILWAUKEE SCHOOL OF ENGINEERING

B.S. in Computer Engineering | Date of Graduation: 2012

Graduated with a B.S. in Computer Engineering, where I was recognized on the Dean's List and awarded an \$8000 annual scholarship. My education provided a strong foundation in both the theoretical and practical aspects of computer engineering, preparing me for a successful career in technology and software development.
